

# Website & Admin Panel

## INFORMATION & ASSETS CHECKLIST

Everything we need from you to take the website live

Prepared for: **Richa Marwaha Jain**

BEFORE YOU START

# How to use this document

Thank you for approving the design. The look and feel of the website and admin panel is ready, using sample (dummy) products and placeholder text. To turn it into a live, working online store we need the information, accounts and files listed in this document. Items marked with an empty box are what we need from you; tick each box once you have shared it.

> **Don't worry about getting everything perfect**
> Where you do not have an answer yet, write **"Need help"** and we will suggest a sensible default that you can approve. Where a policy or number is only a placeholder right now (for example the free-shipping amount), we have listed our assumed value so you can simply confirm or change it.

## What is where

| # | Section | What it covers |
|---|---|---|

## Suggested order of priority

| Priority | What | Why first |

| 2 | Policies (Section 4) and shipping / offer decisions (Sections 5 and 6) | Needed for payment approval and for the website footer pages |
| 3 | Product list and prices (Section 7) | We can load these into the admin panel in bulk from a sheet |
| 4 | Product photographs (Section 7) | Largest task; we can launch in batches, category by category |

# Accounts we will register (Google account and services)

To keep everything in your ownership, all accounts below will be created **in your name and your business email**, and we are added only as a team member / collaborator. This way you stay in full control even if we are not around. The first step is one business Google account.

## 2.1 Step one: a business Google account

| | WHAT WE NEED | YOUR ANSWER / NOTES |

| ☐ | **Share the email address with us**<br>Share the email only - never share the password in a chat. We will guide you through each sign-up on a call, and you enter OTPs / passwords yourself. | |
